

Instructions Firmware Update

1. Download the firmware „ Firmware_english.zip“ from the website to your PC and unzip
2. Connect the device to your PC with the supplied USB cable and start the PC APP
3. Select tab "System" and there "Update, Reset"
4. Under "Update", click in the input field behind "New Firmware" and select the firmware file " Firmware_VersXXX.bin" (XXX: version number)
5. After the firmware file has been selected, press the "Start update" button

Note: Do not interrupt the USB connection during the update process!

6. When leaving the PC APP, maybe on some tabs you will be prompted again to take over the data. Please confirm if this data should be retained.
